ELSEVIER

Journal of Statistical Planning and Inference 44 (1995) 399–400

journal of statistical planning and inference

Author Index Volume 44 (1995)*

Bain, L.J., *see* G. Gan (1) 37– 46
Baksalary, J.K., A. Markiewicz and C. Radhakrishna Rao, Admissible linear estimation in the general Gauss-Markov model with respect to an arbitrary quadratic risk function (3) 341–347
Baksalary, J.K., S. Gnot and S. Kageyama, Best estimation of variance components with arbitrary kurtosis in two-way layouts mixed models (1) 65– 75
Basawa, I.V., *see* S. Sethuraman (2) 219–235
Basu, S., Ranges of posterior probability over a distribution band (2) 149–166
Blumenthal, S. and R.C. Dahiya, Estimation of sample size with grouped data (1) 95–115
Casella, G., *see* C. Goutis (3) 327–340
Chang, Y-C.I., Estimation in some binary regression models with prescribed accuracy (3) 313–325
Chu, C.K., Bandwidth selection in nonparametric regression with general errors (3) 265–275
Coleman, D.A., A fixed-width interval for $1/\beta$ in simple linear regression (3) 291–312
Dahiya, R.C., *see* S. Blumenthal (1) 95–115
Diebolt, J., A nonparametric test for the regression function: Asymptotic theory (1) 1– 17
Gan, G. and L.J. Bain, Distribution of order statistics for discrete parents with applications to censored sampling (1) 37– 46
Gnot, S., *see* J.K. Baksalary (1) 65– 75
Goutis, C. and G. Casella, Improved invariant set estimation for general-scale families (3) 327–340
Haines, L.M., *see* S. Mukhopadhyay (3) 385–397
Hedayat, A.S. and D. Majumdar, Generating desirable sampling plans by the technique of trade-off in experimental design (2) 237–247
Horváth, L. and Q.-M. Shao, Limit theorems for the union-intersection test (2) 133–148
John, P.W.M., M.E. Johnson, L.M. Moore and D. Ylvisaker, Minimax distance designs in two-level factorial experiments (2) 249–263
Johnson, M.E., *see* P.W.M. John (2) 249–263
Kageyama, S., *see* J.K. Baksalary (1) 65– 75
Kundu, D. and R. Kundu, Consistent estimates of super imposed exponential signals when some observations are missing (2) 205–218
Kundu, R., *see* D. Kundu (2) 205–218
Lecoutre, J.-P. and E. Ould-Said, Convergence of the conditional Kaplan-Meier estimate under strong mixing (3) 359–369
Lin, D.Y. and Z. Ying, Semiparametric inference for the accelerated life model with time-dependent covariates (1) 47– 63
Liu, W., On the existence of tests uniformly more powerful than the likelihood ratio test (1) 19– 35
Madi, M.T., On the invariant estimation of a normal variance ratio (3) 349–357
Majumdar, D., *see* A.S. Hedayat (2) 237–247
Markiewicz, A., *see* J.K. Baksalary (3) 341–347
Moore, L.M., *see* P.W.M. John (2) 249–263
Müller, C.H., Maximin efficient designs for estimating nonlinear aspects in linear models (1) 117–132
Mukhopadhyay, S. and L.M. Haines, Bayesian D-optimal designs for the exponential growth model (3) 385–397
